

ABOUT GLYCAN

Sciences

We rely on strong scientific knowledge and expertise. We use the best rigorous sciences led by the best experts.

Engineering & Industry

Our Agency is naturally Industry oriented, we develop the Engineering of tomorrow thanks to the best of today's.

Strategy

Our mission are carried out with the care of intelligent and strong strategies, we rely on the best business ethics.

GLYCAN SPACE INDUSTRIES

www.GlycanSpaceXR-Agency.com

<https://glycanspacexr-agency.com/extraterrestrial-mining-and-refining/>

AGENCY is a Space Agency for Research and Development of human activities (based in Switzerland, United-States and Europe), concerning the Industrial and Robotic fields in NEO-LEO Space and Deep Space, on the Moon, planets and their moons in the solar system and beyond.

Some activities to disclose are subject to prior DD / NDA because of the sensitivity of these activities.

All of Agency's activities are legally developed with the support of patents, trademarks, or "know-how" and "joint venture" businesses contracted with various Institutions, Universities, Laboratories and organizations or foundations at the International level.

AGENCY proposes Joint Ventures in order to construct PERT- HELIOTORR- TERMINATORR-MOTORR-Explorer-Analyzorr-Extractor-Refiners Stations.

AGENCY proposes to create a commission banking space to study the establishment of a new currency adapted to extraterrestrial activities.

As such, all Agency job, from a Security point of view or from a Technological point of view for examples, deals with Space Development.

Extraterrestrial Mining and Refining(belts of ASTEROIDS - (Planets-MOON-Moons)-
Space Debris Remediation LEO-GTO-GEO (plasma tools PERT)-servicing in the solar
system and beyond –

Orbital stations in deep space

Astrophysics and fundamental physics, tools for deep space.

Space CHEMISTRY (mainly Silicon isotopes and rare earths) under low and deep
space.

Alloys in deep space(HELIOTORR stations)- large architectures.

Space propulsion

Disruptive technologies

Mass Spectrometry

Use of Helium 3

Space colonization and collateral engineering (protection against space radiation)

New version of TAGSAM TOOL OSIRIS REX MISSION (plasma tool) EXPLORER-
ANALYZORR-EXTRACTORR-REFINERS

Agronomy Engineering for planets (GENESIS) plan - from minerals to organic-RNA-
DNA - synthesis to plant Intelligence-Quantum state-and communication.

Magnetic and EM tools for human and plants

Regeneration of trees , roots to trees.

CARBON to SILICON

SN1-SN2 Glycan synthesis with Si atoms

SPACE DEFENSE

Plasma tools for SUN and stars architectures

Patents, international publishing.

Cooperation with NON profit organizations

Joint ventures with space industries

Financial tools SPAC-REGA + IPO

ISS refurbished NEW VERSION as HELIOTORR STATION (facility) large structures to be
assembled in space-Robotic factory for TERMINATORR tools and defense.

Federate others corporates in order to remediate more rapidly 700 objects-1000
objects per year LEO-Constellations- GTO- Orbital stations.
